🏠 PROFILE

Experienced Azure Solution Architect & Data Engineer skilled in building cloud pipelines with Azure Data Factory, Synapse, and SQL. Upskilled in AI, Machine Learning, NLP, and Generative AI to deliver smart, data-driven solutions. Proven expertise in cloud security, database administration, and optimizing cross-functional data flows. Dedicated to driving business growth through innovative cloud and AI architectures.

🛠 SKILLS

Python | Machine Learning | Deep Learning | SQL | Pgadmin | Datafactory | Synapse Analytics | Hugging Face | Azure Cloud | AWS Cloud | Power BI

📁 PROJECTS

Amazon Sales BI & Predictive Analytics Dashboard

- Engineered an end-to-end Python pipeline to extract, clean, and analyze 10 years of Amazon India data from PostgreSQL into a dynamic Streamlit BI dashboard.
- Developed machine learning models for sales forecasting and customer churn prediction, integrating interactive modules for RFM segmentation, pricing, and reviews

Cricbuzz LiveStats Platform

- Built a Streamlit sports app streaming live Cricbuzz API data into SQL Server with in-memory buffering for instant updates.
- Engineered an analytics engine powered by 25 complex SQL queries to track key match and player metrics.
- Integrated a secure SQLAlchemy CRUD admin dashboard for live database management and system control.

SmartVision AI: Multi-Class Object Recognition System

- Built a Streamlit app using PyTorch (ResNet50, MobileNetV2) and YOLOv8 for image classification and real-time OpenCV object detection.
- Containerized the application with a lightweight, headless Docker setup for streamlined cloud deployment.

📅 EXPERIENCE

Qubespace LLP - Azure Solution Architect

06/2023 – Present

- Build ETL pipelines using Azure Data Factory, Synapse, and SQL Pools while ensuring secure data migrations and Microsoft Purview governance. Additionally, deploy Azure VMs and App Services, troubleshoot network issues, and manage 24/7 logs and automated alerts. To secure cloud environments, configure Firewalls, NSGs, WAFs, App Registrations, and client access credentials.

AV Business solutions - Senior Process Analyst and HR

10/2020 – 01/2022

- Deploy and secure Azure VMs by managing snapshots, costs, NSGs, and RBAC permissions. Build ADF pipelines, write SQL scripts via RDP, and partner with UK/US clients to onboard new hires. Lead meetings on ETL performance and create detailed reports for stakeholders.

CIPET - SQL Developer and Academic assistant

05/2016 – 03/2018

- Build ADF pipelines to move student data from Blob storage to SQL Server, develop mark list apps with SQL to publish results, and provision and monitor Azure VMs, SQL databases, and secure storage.

Shri Krishnaswamy Matric.Hr.Sec.School - Computer Teacher

06/2013 – 04/2014 | Chennai

MA Pharama - Administrative Consultant

20/04/2011 – 31/01/2013 | Chennai

M/s TLC RM Pvt.Ltd - Tele Consultant

25/10/2010 – 15/04/2011 | Chennai

🎓 EDUCATION

B.Ed(CS), S.R.B college of Education,Chennai

2014

M.Sc (S S), Sree Saraswathi Thyagaraja college,Pollachi

2010

🏆 CERTIFICATES

Master Data Science Program | Visual Basic .Net Programmer | SAWIT.AI Learnthon Program | Advance Data Visualization Using Power BI
